

Max Wintermark, MD, MS, MBA

Max Wintermark is a neuroradiologist with a specific interest and expertise in advanced neuroimaging. He is a Professor and the Chair of Neuroradiology at the University of Texas MD Anderson Center. He serves as the President-Elect of the American Society of Neuroradiology (ASNR). Dr. Wintermark is an expert of clinical translation of advanced imaging techniques, including for stroke, brain, spine and head and neck tumors, traumatic brain injury and psychiatric disorders. He has pioneered perfusion CT imaging and serves as the imaging core for a number of adult and pediatric stroke clinical trials.
